Dear KOFC Isabella Council #15

May you and your family be blessed with love, joy and good health!

My dear brothers across the miles, I'm happy to have this chance to write you. My life has changed into something better because of the great activities I've attended and the benefits I've received from the foundation through your support.

My father works as a scavenger. He has a lot of skills like hair cutting, lettering and painting, which are the source of income. He works specially during the rainy season, which is too dangerous to stay at the dumpsite. He's a hard-working father for me and my siblings.

As the eldest, I want to show a good example to my younger siblings. Thank God, the foundation helps me grow as a better person.

We still have our regular C.O.C. and values formation headed by the scholars. We have so much fun too during their scholars organization's 1st year anniversary. There's a quiz bee, team building, talent search and poster-making contest.

We also celebrated Earth Day, learning a lot about how to save the mother earth. Help us to reuse, recycle and reduce the waste we throw every day. We also had a clean and green drive. The whole community got busy on this day.

I had fun too during the family day celebration at the beach resort. Swimming all day and playing parlor games with our family was very memorable.
