Dearest KOFC Isabella Council #15,

May all you dear brothers be bless with love ,happiness and health along with your family all the time.

I'm always excited to write you about our situation here specially my studies.

I'm in second year high school. Though I don't have an excellent grades during our first quartering examination but still I have good grades. Our lessons are getting harder specially in mathematics and science but I seek the help of my cousins for me to cope up with our lessons. I really want to finish studies for me to help supporting the needs of my siblings. I really want to finish studies to have a good job. I already have stepbrother and sister. I love them, their both sweet and very loving. My step-mother is also kind and supportive.

My Father wasn't able to work for a week because the dumpsite was temporarily closed it might have trashslide due to continuous rain for almost two weeks.

Classes were suspended too for a week, which took us to have make up classes every Saturdays. During the typhoons, Roads were not passable, thousands of families were very much affected. We weren't able to help anything because we also don't have any source for a week but we pray for them a lot and our school conduct a fund raising for the victims of typhoon.

How about your brothers? Are you also experienced typhoons? May I know anything about your family if you don't mind?

Thank god despite of what happened were all safe. And now the weather is getting better. We still hope and pray that there's no more typhoon so that our fellowmen who were affected can recover from the tragedy.
